It's Easy to Learn... The most frequent comment we get about our software is that it is so easy to learn and use.  "It works like surveyors work" making it instinctive and intuitive. With 30-Days of FREE Tech Support, FREE Web Seminars and our industry leading On-Line Training, you can be up and running in days.

It's Quick... We can't say enough about our Quick View™ Technology. You see what your data looks like without drawing it. Just choose from your own list of Traverse Settings like line type, color, symbol, lot labels, etc. and you have a very sophisticated drawing without drawing a thing yourself.

It's Smart... Smart Drawing Objects™ like the legend, title block and line table automatically update themselves as you edit the drawing saving you a ton of time and ensuring that your drawing is accurate and complete.

It's Practical... One of the very first things you'll notice about TPC Desktop is that it's Practical - it just makes sense for surveying.

It's Complete... TPC Desktop is a complete survey program. We’ve been around since 1987 so it’s all here. You don’t need other software. Period.

TPC Desktop isn’t like anything you’ve ever used—it’s different

"I am the sole Land Surveyor for a resource company who actively manages over 420,000 acres in Northern California. I do not have time to learn complicated CAD programs which were not designed specifically for surveying. I need a stand-alone survey program that is intuitive, powerful, efficient, and is backed by excellent tech support. Traverse PC has been that program for me for over 14 years."

"I took a semester long class on Land Development Desktop to see if I could benefit from such a program at work. Over the course of the semester, I learned how to import points, develop a contour map from the points, insert text, and print. I tried Land Development Desktop but came running back to Traverse PC."

"Using Traverse PC, I was able to teach myself in less than a day how to do everything I learned in the semester long class. Traverse PC is the way to go for all Land Surveyors."

Pete Jackson, LS & RPF in CA

TPC Desktop is the way to go for all Land Surveyors.
I have been using Traverse PC since its inception back in 1987. I can almost guarantee you will be working efficiently right out of the box. I give their program a hearty thumbs up!

Bruce Anderson, LS in ID

Technology at work for you wherever you are

practical solutions for today and tomorrow since 1987

A POSTCARD FROM INDIA

“I celebrated my retirement from 33 years as a paid Land Surveyor by volunteering for a project in India with Engineering Ministries International. I was part of a nine person team that had to gather data on a 100+ acre missionary complex in only 6 field days, to create an as-built drawing of the site.”

“Traverse PC proved to be a true blessing by enabling me to aid in the creation of the drawing after returning to the US. It allowed me to easily match the local Indian UTM datum and units used by the staff in India. I imported their CAD drawing sheets to use as an underlay while I created the surface contours from our field shots. I then exported the surfaces as a .dwg file for their review, feedback and inclusion in their drawing. I was also able to effortlessly import satellite imagery to help check locations of buildings, canals, etc.”

“The TPC technical staff was always fast to respond to any questions or problems I was having with the surface drawing, and made finishing this project an absolute joy!”

Barbara Brewer Cooper in India
LS in CA, OR & HI

WELL EQUIPPED
- COGO / Field Book / 3D
- Spell Checker / Plat Checker
- Legal Description Writer
- Predictive Data Entry
- Office Style Menus / Toolbars
- Traversing / Adjustments
- "Quick View" technology
- Field-to-Finish / Point Codes
- Shrink-wrap Drawing Objects
- Geometrics
- Cadastral / PLSS
- Curve Fitting / Cut-de-Sacs
- Contours / Volumes / DTM
- Slope Analysis / Cut Sheets
- Subdivision Layout / Reports
- Stakeout Report
- Least Squares Network
- ALTA/ACSM Land Title compliant
- Alignment / Offsets / Stations
- Vertical Curves / Profiles / X-Sec
- Surshots / Angle Sets
- Raster Image Support
- Network Ready
- User Collaboration Tools

WELL ESTABLISHED
There are reasons we've been successful for over 27 years:
- We're point based - always have been - always will be.
- We designed it for surveying - unlike CAD.
- We made it easy to learn and easy to use - it's our trademark.
- We have great tech support - you talk with a real person.
- We have thousands of users who run TPC every day.
- We still run our own survey business - it makes a difference.
- We listen to our users - they have great ideas.
- We make surveying fun again - it's about time.

NO MODULES
We don't nickel and dime you with additional modules. There are no modules with TPC Desktop.

TPC Desktop comes in three editions: Personal, Premium, and Professional. Choose the edition that's right for you or upgrade anytime for the cost difference.

Personal Edition               $800
Premium Edition            $1,400
Professional Edition       $2,000

WELL CONNECTED
TPC Desktop directly supports GIS, GPS, DWG, DXF, DGN, CSV, TDS, Generic ASCII, Trimble, SMI, Nikon, Sokkia, Leica, Pentax, CST Berger, DCA, Pasco, PNG, TIF, PDF, ...and the list goes on.

Chances are, you'll find your data collector, total station, or GPS already in the list.

A POSTCARD FROM NORTH OF THE ARCTIC CIRCLE

“The economics are simple. Without Traverse PC our company would not have this lucrative contract. The Department of Defense would accept only AutoCAD or Traverse PC. AutoCAD is not surveyor friendly.”

“I could not do this job with such ease without the help of Traverse PC. With Traverse PC I can survey in the field first or survey on the computer first and reconstruct in the field. Layout and volumes are a snap.”

Bob Holtkamp, North of the Arctic Circle
LS in Canada

BUILT-IN EVERYTHING
With TPC Desktop, everything is built in and works together. You might say it’s synchronized.

Add a point to the Traverse View and it shows up automatically in the Quick View drawing and the Point View and the Legal Descriptions and the... ...you get the idea. It’s synchronized!

WELL EQUIPPED

JUST RIGHT-CLICK

CAD can be your worst nightmare... ...learning CAD with all those non-survey commands... AARRGH!

TPC Desktop is built on top of Windows, so just about everything is a right-click away. Need to change a point symbol from a Rebar to an Iron Pipe? Just right-click and choose Properties. Simple.
